PRICE TEN CENTS

## MILLIONS AVAILABLE TO DEVELOP NEW DISTRICT

### ROYSTON CONTINUES IN LIMELIGHT WITH MANY RICH STRIKES

Royston, the new mining camp in the San Antonio district, is growing like a weed, and the enthusiasm continues unabated. Great changes are noticeable from week to week to the frequent visitor, and there seems little doubt concerning the permanency of the camp.

It is a happy and prosperous district which is probably inhabited by fully 150 people, and tents are in evidence in almost any direction one may gaze. New arrivals with camping outfits appear daily, and there is a hum of activity that has not been noticed in southern Nevada in the last dozen years. This is due largely to the fact that Royston lies 25 miles north of Tonopah, and unlike the days of the Divide excitement, people cannot make trips to and from their prospects daily.

The miner and prospector is up early and retires late. He does not confine himself to the number of hours he may labor, but is bent upon finding something worth while, and from the numerous rich mineral finds that are reported almost daily, his efforts, as a rule, are not in vain.

That a mining camp is in bloom that promises to have a long lease on life is not doubted by the average person who has visited the district. The first house to be taken in on wheels arrived at Royston today and will be fitted up as a restaurant by J. W. Draper, who has been conducting an eating house for the last 10 days in a tent. Substantial framework for tents to insure comfort to miners during the winter months is in order, and the activity that is noticeable convinces one that the prospector is in the field with determination to thoroughly exploit that mineral region.

The Beers lease on the Golden Eagle claim of the Hudson Mining company estate is proving a real wonder. The incline shaft has passed the 20-foot point, and the orebody is bigger and richer than at any time since development was instituted. Yesterday afternoon it had a width of 8 feet, and within three hours 25 sacks of high-grade had accumulated. In addition to this there was accumulated several tons of what is termed second class ore that shows assay values of close to 200 ounces silver a ton.

Where the big vein of high-grade ore is exposed a junction of two veins evidently occurs. One strikes, or heads, almost in a straight line for the Frisco claim, which is held under option by the Super Six Mining company, and upon which 12 sets of leasers are at work. The other heads in the opposite direction, but at the junction a magnificent body of high-grade ore is exposed that promises to enrich the four interested parties, B. F. Betts, Harry Cunningham, George Box and C. Y. Fox, by many thousands of dollars.

G. W. Sullivan, of the Sullivan Service Station, and Eugene Dougherty, well known in mining circles, yesterday closed a deal whereby they paid \$1500 cash for a one-half interest in two blocks of ground, known as 1 and 2, on the Frisco claim, which were held by Louie King, Billy Ford and Tiny Martin, the first two being members of the Chinese race. The showing on this ground is unusually good and the outlook is promising for early shipments being started.

The Putnam shaft, operated jointly

THE WEATHER	
Local Observer, United States	
Weather Bureau:	
Temperatures 5 a.m. Noon	
Current	48 60
Wet bulb	38 40
Relative humidity	50 38

1921 1920	
Maximum yesterday	64 60
Minimum yesterday	32 30

by Rayercraft Bros., Captain A. Case and Brown, and those interested in the Putnam lease, was sunk 15 feet in three shifts. Another crew was put on last night and it is proposed to prove up the persistency of the orebody with all possible speed.

The ground held in reserve by the Super Six Mining company, and upon which development is going forward, will probably be the second shipper of the new camp. A great open-cut has been dug and now the ground is being shaped for the sinking of a shaft that will be put down for at least 50 feet before any drifting is started.

On the Homestead claim, Sam H. Smith, J. W. Draper, Hughie McClusky, Joe McCann and Sandy McDonald are reported as having uncovered a fine looking vein of ore. While no assays have been had, it is agreed that the ore will mill anywhere from \$50 to \$100. These leasers have employed an engineer to run out their lines and get them started in the right way before shaft sinking is started.

Throughout the entire district everybody is busy. Prospectors are combing the hills in every direction and ground has been staked as far away as five miles.

### \$155,000 SENT TO COAST CITY BULLION BARS

The Tonopah Belmont Development company broke all previous records in production of bullion covering a period of 15 days, during the last half of October. The shipment that went out this morning consisted of 74 bars, weighing 124,110 ounces in silver and 1944 ounces in gold, having a value in round numbers of \$155,000, although figures given out by the company show it to be worth \$153,136.96. The previous high record was \$125,000. The increased output goes to show the great efficiency that is being secured in both mine and mill workings and that the property possesses great riches. As is usual when the value of a shipment exceeds \$100,000, a guard accompanied the bullion to San Francisco.

### RIVER PROBLEM COMES BEFORE THIS GATHERING

RIVERSIDE, Cal., Nov. 14.—The Colorado river question, which has ramifications that extend beyond many states through which the river flows, will make the convention of the League of the Southwest to be held here December 8 to 10 a meeting of national importance. Secretary of the Interior Fall, a number of government representatives of various departments, as well as congressmen, and Sir Adam Beck, head of the hydroelectric corporation of Ontario, Canada, are expected to be present.

The Boulder Canyon dam project on the Colorado system will be discussed, and all questions relating to the Colorado will come within the scope of the meeting.

PROCLAMATION  
WASHINGTON, D. C., Nov. 14.—The president signed the proclamation declaring peace with Germany just before 4 p. m. today.

### STRONG ISSUES TAKE A DROP ON N. Y. EXCHANGE

(By Associated Press)  
NEW YORK, Nov. 14.—Proposals by the United States government for limitation of armament caused moderate selling of so-called war shares at the opening of the stock market today. Bethlehem Steel, one of the largest armor plate producers, reacted 2 points in the first hour, Crucible Steel losing 1 1/2, while United States Steel and kindred issues registered sympathetic declines of fractions to 1 point.

### GREAT STRIKE OF CLOTHING WORKERS IS ON

(By Associated Press)  
NEW YORK, Nov. 14.—Sixty thousand garment workers were called out on strike today in protest against the piecework system and the increase from 41 to 49 hours a week, which was to be put into effect today by employers.

### CONVICTS KILL PRISONER WITH USE OF KNIFE

(By Associated Press)  
POLSON, Nov. 14.—Two state prison convicts, George Donnelly and Ed Newman, are held in solitary confinement, suspected of having murdered Earl Morse, a fellow prisoner, in a corridor leading to the dining room Saturday. The man was killed with an improvised dagger thrust into his neck.

### TIM MURPHY IS SENTENCED SIX YEARS IN JAIL

(By Associated Press)  
CHICAGO, Nov. 14.—"Big Tim" Murphy, former state representative, gang leader, and president of the Gas Workers and Street Sweepers union, was sentenced to six years in Leavenworth and fined \$50,000 today by Judge Landis for his part in planning the \$350,000 Dearborn station mail robbery last April.

### STEPHENS APPOINTS ASSOCIATE JUSTICE

(By Associated Press)  
LOS ANGELES, Cal., Nov. 14.—Governor Stephens today announced the appointment of Associate Justice Lucien Shaw, of Los Angeles, to succeed F. M. Angellotti as chief justice of the state supreme court. Angellotti resigned several weeks ago to accept a position with the western Pacific.

### MR. AND MRS. ROBB ARE GRANDPARENTS

Mr. and Mrs. D. J. Robb were informed by wire Saturday night that they had their first grandson in the person of a 7 pound boy who was born to their son and daughter-in-law, Mr. and Mrs. Ray Robb, in San Francisco, that afternoon. Mother and infant were reported as getting along nicely. The presence of a male heir greatly pleases the elder Robbs, although they were happy in the thought that they had two granddaughters. Mr. and Mrs. Ray Robb left here some time ago for the Bay City.

### ENGLAND IS FAVORABLE TO HOLIDAY TEN YEARS

(By Associated Press)

WASHINGTON, D. C., Nov. 14.—Great Britain's acceptance "in principle" of the American proposals for limitation of naval armament is definitely forecast in a statement on behalf of the British delegation. Japan's acceptance "in principle" at least has been forecast by statements by Admiral Baron Kato and others of the Japanese delegation.

Great Britain's principal consideration, it is understood, in framing the reply which Haldane will make tomorrow, has been the question of what will be done to bring France and Italy within the scope of the plan for limitations. The American delegates, it is understood, impressed their British colleagues with the advisability of first disposing of the question as it affects the three principal, United States, Great Britain and Japan.

(By Associated Press)  
LONDON, Nov. 14.—The American plan for a 10-year naval holiday and scrapping of all but a limited number of warships calls for much less sacrifice on the part of Great Britain than that of the United States and Japan, in the view of the naval correspondent of the Daily Mail.

The proposed sacrifice, he says, "would be a heavy one for Japan and the United States, but comparatively trifling for Great Britain, as the latter has not incurred any great outlay on the four new ships just ordered. The American scheme involves no injury to the British interests, for in plain fact, the British navy today is third in post-war ships and ocean-going submarines, two factors which will probably count for most in future naval warfare. The real question is whether Japan will be content to accept conditions which will place her navy in a position of permanent inferiority."

Americans proposals for drastic limitation of naval armament have been received with expressions of much favor in British official circles. While the cabinet will not officially discuss the proposals until the British experts have reported, after examining them, it is stated that individual members of the cabinet wholeheartedly support the broad principles contained in the address of Secretary Hughes at the opening of the conference.

Heads of the delegations of the nine powers invited to participate in the discussion of Pacific and far eastern questions went into conference this afternoon to discuss conference procedure.

The British experts feel the limitations on airplane carriers will give the United States some advantage because the British already have a number which will become obsolete while the United States will build new ones of a superior character.

Great Britain's acceptance "in principle" of the American proposals, as it will be laid before the conference tomorrow, will be based on what is described as "certain definite modifications." Among the most important is a program for replacement. Instead of a flat 10-year holiday during which no new ships will be built, the British have in mind a replacement program to be carried on from year to year, to keep the shipyards from going to rot, or allow each country a one-ship building plant. It is said the British may propose abolition of submarines.

### WEEKLY WEATHER FORECAST

Pacific States: Normal temperature and generally fair weather, except for occasional rains on the north coast.

### HOME BREWERS CONSUME GRAPE CROP QUICKLY

(By Associated Press)

SAN FRANCISCO, Cal., Nov. 14.—Willingness of American home brewers to "take a chance" with popping corks and exploding casks is assigned by the California Grape Protective association as the reason why this year's 250,000-ton California grape crop was disposed of at record prices. Despite the public's hard experience with the delicate fermentation process, it is demanding the grapes faster than they can be grown.

### FAT ARBUCKLE TRIAL NOW ON IN BAY CITY

(By Associated Press)

SAN FRANCISCO, Cal., Nov. 14.—Fatty Arbuckle, favorite motion picture comedian, went on trial today on a charge of manslaughter growing out of the death of Virginia Rappe. Scores of witnesses on both sides awaited a call to the stand.

### HIGHEST COURT DISPROVES OF STATE RIGHTS

(By Associated Press)

WASHINGTON, D. C., Nov. 14.—Chief Justice Taft announced today that the supreme court would deny a motion by the state of North Dakota against the Chicago & Northwestern and other railroads, involving the right of the interstate commerce commission to increase rates in the state.

### 132,000 MEN ENROLLED IN STATES' ARMY

(By Associated Press)

WASHINGTON, D. C., Nov. 14.—With a total of 132,000 men enrolled, national guard units recognized by the federal government have reached a strength almost equal to the present regular army. It is announced by the war department organization of new units to bring the national guard up to its authorized strength of 222,577 is being prosecuted vigorously by all states with the exception of Nevada, and 54 additional units, with a strength of 6089, received federal recognition during October.

### NINE PERSONS BURNED DEATH IN NEW YORK

(By Associated Press)

NEW YORK, Nov. 14.—At least nine persons are believed to have been burned to death in a tenement house fire today. Five bodies, huddled together near a doorway on the fifth floor were discovered, and firemen later found three more. The building, a five story tenement, was occupied by 15 families. Investigation showed the fire originated in the basement and roared upward through an airshaft.

### CAMP ROYSTON HAS BACKING OF WALKER BROS. OF SALT LAKE

Royston, the new mining camp located 28 miles north of Tonopah in Nye county, will not go undeveloped for lack of capital. Millions will be available for the exploration of this great mineral region which has remained neglected owing to a conflict of titles, but which has recently been amicably adjusted.

With the arrival in Tonopah this morning of J. R. Walker, head of the Walker Brothers Mercantile company of Salt Lake City, and the largest stockholder in the Walker Copper company, who serves as president of the Hudson Mining company, Charles R. Walker, his son, who serves as a director in the Hudson Mining company, and C. A. Walker, who is also heavily interested in the camp of Royston, and being a dominant factor in the Walker Copper company, an era of great prosperity that smacks of the boom days of Tonopah and Goldfield, seems imminent.

The Walker Copper company has a vast copper estate in Plumas county, California, in a heavily wooded district, and it is estimated that there is blocked and ready for extraction over \$30,000,000 in that metal. The copper content averages 5 per cent, and the gold and silver values are sufficient to pay cost of mining and treatment. A sawmill of immense capacity was recently completed which will furnish lumber for future operations, while an aerial tramway has been constructed that has a length of nine miles. In addition to this a power line having a length of 15 miles has been built, and everything is in readiness for a campaign of ore extraction and reduction that promises to place these holdings in the front ranks of copper producers of the west.

"Royston is the big hope of conversation in Salt Lake City," remarked J. R. Walker this morning. "In financial circles you hear of the new silver discoveries on every hand, and in view of the fact that silver promises to remain at a dollar an ounce for a long period, the outlook is bright for your new Nye county camp, enjoying an unprecedented era of prosperity. Nevada is in need of a new mining revolution that possesses merit and I believe that the day has arrived when Royston is going to prove the magnet for investors and mining men from every section of the country. We have long been confident concerning the richness of the San Antonio district, and now that harmony prevails you can look forward to some national developments in the new fields."

"My son, my brother and I are leaving today for the new camp of Royston to make a general observation of the district. We expect to remain several days going over the situation with W. H. Royston, vice president and general manager of the Hudson Mining company, and before we take our departure from Tonopah a campaign of mine building will be outlined that will result in the big noise now being heard in these parts reverberating in all directions."

It is the desire of Mr. Royston to proceed with the sinking of the 300-foot incline shaft to an additional depth of 300 feet. In order to facilitate matters it will be necessary to install a new engine and other machinery, but funds will not be lacking. It is also planned to develop a large amount of the property of the company that has been held in reserve from leasing. Mr. Royston stated this morning that less than one-half of the ground owned by the Hudson Mining company had been leased, and that the remainder was being withheld to permit of operations on company account.

"We hear of new discoveries being made as far away as four miles," concluded Mr. Walker. "That is indeed pleasing. We want to see a mining camp of great magnitude

and permanently spring up, and we need certain each is now in the ascendancy at Royston. To make matters worse it is necessary that many lines be developed, thus eliminating the domination of one company domination."

The arrival of these capitalists will be followed from time to time by other financial interests in Utah, according to Mrs. Walker, and it now begins to look as though the Mormon state was going to take the steam away from the coast people who have so invariably played a leading role in the development of new mining camps in Nevada.

### ARMAMENT SHARES TAKE QUICK DROP

LONDON, Nov. 14.—Armament shares on the stock exchange showed a sharp drop today, following the announcement of Secretary Hughes at the Washington armament conference. The whole list of such shares was marked down in anticipation of selling, which however, had not appeared in any force up to the hour.

### REVOLUTION IS NIPPED IN BUD LOWER CALIF.

(By Associated Press)

SAN DIEGO, Cal., Nov. 14.—With Governor Vinton personally on the ground, and General Rodriguez in command of the defending troops, the incident revolution just below the border in Lower California appears to have been snuffed out by the killing of 90 of the rebels, and the scattering of the remainder of the band of 50 men. Conditions in Lower California today are reported to be quiet.

Travel across the line into Lower California remained closed under orders of Mexican officials. Immediately following the results yesterday afternoon the line was ordered closed to all outsiders. Horsemen at the Tinajas ran track newsmen were permitted to cross back and forth yesterday and today.

### SENATE CHIEFS RAG ON ARMAMENT QUESTION

(By Associated Press)

WASHINGTON, D. C., Nov. 14.—Discussion of the American armament limitation proposal broke out in the senate today when an hour after it convened.

### BUTLER THEATRE

The polarization of Zane Grey's Greatest Novel

#### "THE U. P. TRAIL"

With a powerful cast including Roy Stewart, Joseph J. Dowling, Robert McKim and Kathryn Williams, who is again seen as the western dancehall girl which first made her famous in "The Spellers"

Lower Floor 30c; Balcony 25c. Children; Mat. 10c; Night 20c.

#### TOMORROW—

#### "HOME TALENT"

A Mack Sennett 5-reel Special Comedy.
